Multiples and Factors

◈ Complete the following factor tree and write prime factor of given numbers.

①
```
        70
       /  \
      7    10
          /  \
         2    5
```

②
```
        18
       /   \
      2     9
     / \   / \
    ( )( ) 3  3
```

③
```
            72
          /    \
         6      12
        / \    /  \
       2   3  2    6
                  / \
                 2   3
```

④
```
            300
          /     \
        10       30
       /  \     /  \
      5    2   5    6
                   / \
                  2   3
```
